

INTRODUCTION TO GRAPHICS

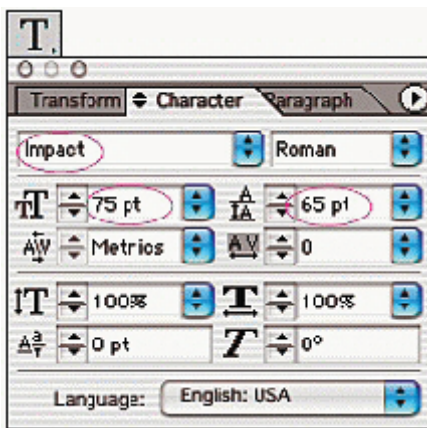

Filling Text with Graphics

Information
Sheet No.

PS760

This info sheet will show you how create a design by placing artwork into it.

Launch InDesign. Choose File > New > Document (Command + N). For Page Size, select Letter and click OK. Using the Type tool (T), draw a large rectangle. Choose Window > Type > Character (Command + T). Select a bold font, (we used 75 pt. Impact on 65 pt. leading).

Type a word one or more times and click the Selection tool. Choose Type > Create Outlines (Command + Shift + O). Choose Object > Ungroup (Command + Shift + G). Choose Object > Compound Paths > Make (Command + 8). Do not Deselect.

Choose File > Place (Command + D), select a graphic of your choice and click Open. Using the Direct Selection tool (A), position the arrow over the image until a hand icon appears. Click and hold to drag the image to your liking.

Here a single sunset image was used to create the effect shown at above.
